

LUND UNIVERSITY
School of Economics and Management

Programme Syllabus for BSc programme in International Business

1. Identification

Name of programme	Bachelor Programme in International Business
Scope of programme	180 ECTS credits
Level	Undergraduate
Programme code	EGIBU
Decision details	School of Economics and Management 2016-06-30
Amendment details	School of Economics and Management 2018-07-02. The programme syllabus is valid for students enrolled autumn semester 2017 and onwards.

2. Programme description

The overall purpose of the programme is to prepare the students for a career in international business. Following this overarching goal, theoretical concepts, models, and tools derived from relevant research will throughout the programme be related to real and complex business problems in order to train the students in advanced problem solving in an international context, thereby developing their knowledge, skills and judgment.

As the name implies the programme has an international focus. It uses international cases and the students can and are encouraged to study abroad for one semester. In addition, the entire programme is taught in English. It prepares the students for management positions in an international business environment by combining courses in International Business with courses in Economics, Economic History, Business Statistics, Informatics and Business Law.

The programme starts by introducing basic concepts and theories within central areas of the programme, including general skills such as for example working in teams, academic writing, and oral presentations. The courses that follow after the first semester add additional perspectives and models that provide further, in depth insights into the practical and theoretical areas that are related to the broad field of international business. As a final part of the programme, students will conduct their own research and demonstrate their ability to independently apply the different ideas and theories introduced by the different courses. This will result in a degree project.

Career opportunities

After graduation students are well equipped for junior management positions at large international companies, government institutions or other organizations. Functional areas can include export, import, finance, controlling, business development, sales, marketing and customer care for example.

Connection to further studies

Graduates from the programme are eligible for applying for postgraduate studies in business administration/international business internationally (limitations due to specific prerequisites may however apply).

3. Learning outcomes

Learning outcomes are mission driven according to the overall goal of the programme stated below.

Mission driven learning outcomes

Graduates of the programme will be trained as reflective practitioners in taking an active part in developing a sustainable society building on innovative thinking.

In addition to the mission driven goal above and in accordance with the Swedish Higher Education Ordinance, the Bachelor degree is awarded to students who at the completion of the programme accomplish the following:

Knowledge and understanding

For a Degree of Bachelor the student shall

- demonstrate knowledge and understanding in international business, including knowledge of the disciplinary foundation of international business, knowledge of applicable methodologies in international business, specialised study in some aspect of international business as well as awareness of current research issues.

Skills and abilities

For a Degree of Bachelor the student shall

- demonstrate the ability to search for, gather, evaluate and critically interpret the relevant information for a formulated problem and also discuss phenomena, issues and situations critically
- demonstrate the ability to identify, formulate and solve problems autonomously and to complete tasks within predetermined time frames
- demonstrate the ability to present and discuss information, problems and solutions in speech and writing and in dialogue with different audiences,
- demonstrate the ability to manage and work in multicultural teams, and
- demonstrate the skills required to work autonomously in the main field of study.

Judgement and approach

For a Degree of Bachelor the student shall

- demonstrate the ability to make assessments in international business informed by relevant disciplinary, social and ethical issues
- demonstrate insight into the role of knowledge in society and the responsibility of the individual for how it is used, and
- demonstrate the ability to identify the need for further knowledge and on-going learning.

Independent project (degree project)

A requirement for the award of a Degree of Bachelor is completion by the student of an independent project (degree project) for at least 15 credits in international business.

Electives (15 cr)	Electives (15 cr)	International business strategy (7,5cr) Knowledge frontier in international business (7,5 cr)	Degree project (15 cr)

Semester 1

The programme starts with three parallel courses: *The firm in an historical setting*, *Introduction to international business*, and *Business statistics*. The first course focuses on one of the hallmarks of modern economies: enterprises, their origin and

their development over the centuries. The second course provides an introduction to the major subject within the programme. The third course provides an introduction to statistics/quantitative analysis with focus on descriptive analysis of data and basic probability theory. The semester ends with two parallel courses: *Financial accounting* and *International marketing*. The first course provides an introduction to the principles of financial accounting, while the second course covers basic aspects of marketing management with a special focus on issues related to international marketing/business.

Semester 2

Semester 2 starts with two courses in economics: *microeconomics*, and *financial economics*. The second half of the semester consists of three parallel courses: *Organisation and leadership*; *Management control systems*, and *Managing digitalisation*. The first course provides an introduction to organising and organisational behaviour, with a special focus on leadership/followership. The second course introduces key concepts/problems of management control. The third course helps students to understand and deal with business digitalization and how it can be leveraged from a management perspective.

Semester 3

The semester starts with two courses in parallel: *International business law* and *Fundamentals of business analytics*. The first course provides a framework for understanding the legal environment in which international firms operate. The course, *Fundamentals of business analytics* continues where the course *Business statistics* ended by focusing on statistical methods that are essential for a business major and introduces business analytics. During the second part of the semester courses in *macroeconomics* and in *international economics* are given.

Semester 4

Semester 4 starts with two courses in parallel: *Corporate finance* (focusing on value based management and sourcing of capital from a management perspective) and *Innovation & entrepreneurship* (targeting key concepts and theories on entrepreneurship and innovation management). The semester then ends with three parallel courses: *Research methods for international business* (enhancing the students' understanding of knowledge/knowledge generation as well as their capacity to do their own research), *Business ethics and sustainability* (includes a basic introduction to moral philosophy, CSR, and sustainability, with a special focus on ethical dilemmas associated with doing business internationally), and *Cross-cultural teams & project management* (focusing key aspects of projects/project management and how to make teams – especially cross-cultural teams - work well).

Semester 5

This semester consists of electives according to the student's choice. Students are strongly encouraged to spend this semester abroad – either at one of LUSEM's many partner universities or on an international internship. For those who wish to stay in Sweden during semester 5, national internships or studies at LUSEM or some other faculty at Lund University provide interesting options.

Semester 6

The final semester starts with courses in International Business at the bachelor's level. The courses both broadens and deepens the students' knowledge, skills, and judgment in relation to international business. The second half of the semester consists of the *degree project*, targeting knowledge development on important issues related to international business. The students are – if applicable - encouraged to do parts of their project abroad.

The quality of the courses (semester 1-6) will be continuously evaluated based upon discussions between the programme director and the professors responsible for the courses. The students will also fill in systematized and structured evaluations for all courses included in the programme and at the end of the programme a special programme evaluation will be carried out.

In order to move effortlessly into each proceeding term, results from the previous term will be taken into consideration.

5. Degree

Upon completion of the programme a degree of Bachelor of Science in Business and Economics (180 credits) will be awarded in compliance with the National Higher Education Ordinance (SFS 2006:1053). Major will be in International Business.

Degree requirements

Degree requirements consist of the student being accepted and enrolled at the BSc programme in International Business, 180 ECTS credits (programme code EGIBU) in order to fulfil the course requirements in accordance with the programme curriculum.

In addition, the following requirements apply:

90 ECTS credits in international business, the credits in international business are to include bachelor level courses of 15 ECTS credits (progression level G2F) as well as an independent degree project corresponding to 15 ECTS credits
30 ECTS credits in economics
7,5 ECTS credits in international business law
12,5 ECTS credits in business statistics

6. Admission requirements and selection criteria

To be eligible for the program the student must fulfill general entry requirements and courses corresponding to the following Swedish Upper Secondary School Programs: Civics 1b/1a1+1a2. Mathematics 3b/3c/Mathematics C and English B (advanced) proficiency.

Selection

The applicant's estimated capacity to complete the programme is the major overall criterion for selection. Students who fulfill the specific eligibility requirements are selected according to previous study results.
